

KUPAONICA i KUHINJA

bathroom & kitchen

aSTONE
by **AQUAESTIL**

Kupaonica i kuhinja su prostori koji se najviše koriste u domu, stoga je kvaliteta materijala koji se koriste za njihovo opremanje imperativ. Dopustite da Vas iznenadimo! AQUAESTIL je razvio materijal ASTONE za Vas kako bi Vam omogućio obavljanje svakodnevnih aktivnosti s lakoćom. Izdržljivost. Otpornost. Izgled. Lakoća održavanja. Neograničene mogućnosti u dizajnu. Izbor je Vaš!

Bathroom and kitchen are the most used spaces inside a home, therefore using quality materials is a must. Let yourself be surprised! AQUAESTIL developed ASTONE for you, to allow you to do your everyday activities with ease and the certainty that you have a product you can rely on. Durability. Resistance. Looks. Easy maintenance. Endless possibilities of design. Choice is yours!

Šta je Astone? What is Astone?

ASTONE je visokokvalitetni kompozitni solid surface materijal razvijen u poduzeću AQUAESTIL, vodećem hrvatskom proizvođaču opreme za kupaoalice.

Tehnički gledajući, ASTONE je prirodni mineral aluminij-tri-hidrat u prahu povezan akrilno-modificiranom poliesterskom smolom i obojan prirodnim pigmentom. Dodavanje različitih prirodnih pigmenata omogućuje da ovaj materijal bude dostupan u brojnim bojama i efektima. Otpornost na sve vrste kemijskih i fizičkih utjecaja te potpuno nepropusna površina čine ASTONE prvim izborom za interijere kada su higijena i skladan dizajn najbitniji.

ASTONE is a high quality composite solid surface material developed by AQUAESTIL, leading Croatian bathroom equipment manufacturer.

By its chemical composition, ASTONE is a natural mineral aluminum tri-hydrate powder mixed with acrylic-modified polyester resin. The addition of different natural pigments allows this material to be available in numerous colors and effects. Resistance to all sorts of chemical and physical influences, as well as its completely impermeable surface make ASTONE the first choice for interiors when hygiene and neat design matter the most.

Otkrijte prednosti. Discover its advantages.

UGODAN NA DODIR PLEASEANT TO THE TOUCH

Opi i vanjski izgled ASTONE-a pruža osjećaj prirodnog kamena, no pruža mnoštvo prednosti pred kamenom i klasičnim keramičkim površinama. Dodirnite ga i otkrijte sami! *ASTONE looks and feels like real stone. However, it offers much more advantages than ordinary stone or classic ceramic surfaces. Touch it and discover it by yourself!*

HOMOGEN I NEPOROZAN HOMOGENEOUS AND NONPOROUS

ASTONE je homogen i neporozan materijal koji Vam ne pruža samo glatku površinu ugodnu na dodir već i površinu idealnu za uporabu na mjestima gdje su higijena i lakoća održavanja najbitniji. *ASTONE is an homogenous and nonporous material, which not only provides you with a smooth looking surface pleaseant to the touch but also with the ideal surface for spaces where hygene and ease of maintenance matter the most.*

OTPORAN NA TERMALNE ŠOKOVE I UDARCE RESISTANT TO THERMAL SHOCK AND IMPACTS

Zahvaljujući svojem sastavu, ASTONE je iznimno otporan materijal koji je sposoban podnijeti termalne šokove i mehaničke udarce nastale pri uobičajenim aktivnostima. Materijal se pritom neće oštetiti i sačuvati će svoj izvorni izgled. *Thanks to its composition, ASTONE is an incredibly resistant material capable to endure thermal changes and mehanical impacts of the everyday use without suffering any damage and keeping its original look through time.*

NEOSJETLJIV NA VEĆINU KEMIKA LIJA RESISTANT TO MOST CHEMICALS

ASTONE je otporan na većinu kemikalija i ostati će nepromijenjen neovisno o vrsti uobičajenih kućanskih kemikalija koje se proliju po njegovoj površini. *ASTONE is resistant to majority of chemicals, it will mantain its look besides on what might be spilled on it.*

STABILIZIRAN NA UV ZRAKE STABILIZED AGAINST UV RAYS

UV zračenje ne utječe na materijal ASTONE pri normalnoj uporabi u interijeru te se njegov izgled i boja neće s vremenom promijeniti. *UV rays do not affect ASTONE in normal conditions of indoor exposure, meaning its physical appearance and colour will remain intact overtime.*

HIGIJENSKI I EKOLOŠKI SIGURAN HYGENIC AND ENVIRONMENTALLY FRIENDLY

ASTONE se jednostavno čisti i održava zahvaljujući tome što je homogen i neporozan. Voda i vlaga ga neće oštetiti, a ujedno sprečava razvoj štetnih bakterija čineći površine sigurnima za Vaše svakodnevne aktivnosti. Proizvodnja ovog materijala ne emitira stakleničke plinove, a sam materijal se u potpunosti može reciklirati. *ASTONE is easy to clean and to mantain thanks to its nonporous homogenous nature. Water and moisture do not damage its surface, avoiding thus the growth of bacterias and ensuring safe surfaces to do your everyday activities. Plus, its production does not emit greenhouse gases and is a completely recyclable material!*

UMIVAONICI washbasins

Našu standardnu ponudu zdjela umivaonika izrađenih od ASTONE-a dijelimo na ugradbene, nadgradbene i one namijenjene ugradnji na pult.

Materijal ASTONE izrazito je pogodan za proizvodnju umivaonika jer je potpuno neporozan, što znači kako se bakterije i gljivice neće zadržavati na njegovoj površini, a održavanje je vrlo jednostavno. Standardna sredstva za čišćenje kupaonice i neabrazivna spužvica su sve što Vam treba.

Umivaonici se mogu bešavno spajati sa ASTONE pločama čime se dobivaju umivaonički pultevi koji se izradom po mjeri mogu prilagoditi gotovo svakoj prostornoj konfiguraciji.

Umivaonički pultevi najbolja su opcija za mjesta gdje je potrebno funkcionalno, estetski dopadljivo i higijensko rješenje. Pogodni su kako za uporabu u kupaonicama i kuhinjama, tako i u hotelima, restoranima, benzinskim crpkama...

Our standard assortment of ASTONE washbasins consist of built-in, semi built-in and those intended for table top installation. Material ASTONE is specially suitable for production of washbasins and kitchen sinks due to its nonporosity, stopping bacteria and fungi from accumulating on the surface, while making cleansing very simple as well. Regular bathroom detergents and non-abrasive sponges are only thing you need.

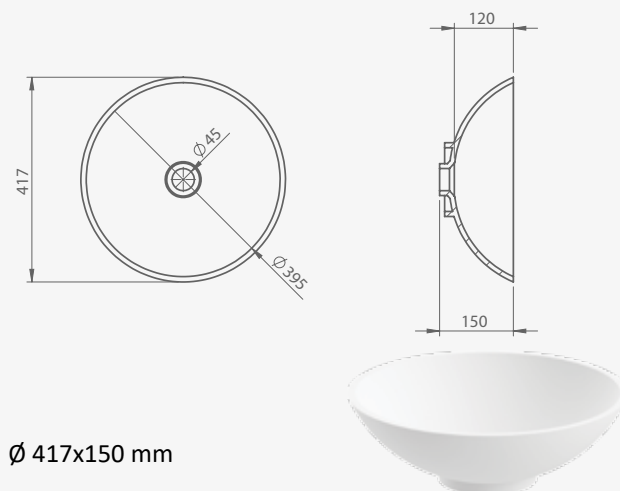

Washbasins can be seamlessly connected to the ASTONE panels, creating counter tops that can be tailored to virtually any spatial configuration.

Washbasin counterstops are the best option for places where a functional, aesthetically pleasing and hygienic solution is needed. They are suitable for use in bathrooms, as well as in hotels, restaurants, gas stations...

Your bathroom, your choice!

*Svaka kupaoonica je drukčija,
imamo rješenje za tebe.*

ASTONE Vam omogućuje da kupaoanske elemente prilagodite Vašim željama i potrebama. Bez kompromisa.

Every bathroom is unique, we have a solution for you.

ASTONE allows you to customize your bathroom elements according to your wishes and needs. Without compromise.

SUDOPERI kitchen sinks

ASTONE se u kuhinjama primjenjuje u vidu radnih površina koje mogu biti bešavno spojene sa sudoperom, čime se dobiva jedna izuzetno funkcionalna cjelina.

Održavanje kuhinjskih površina od ASTONE-a vrlo je jednostavno jer nema spojeva gdje bi se inače zadržavala prljavština, bakterije, gljivice i ostale nepoželjne spustance, čime je postignut najviši higijensko-zdravstveni standard.

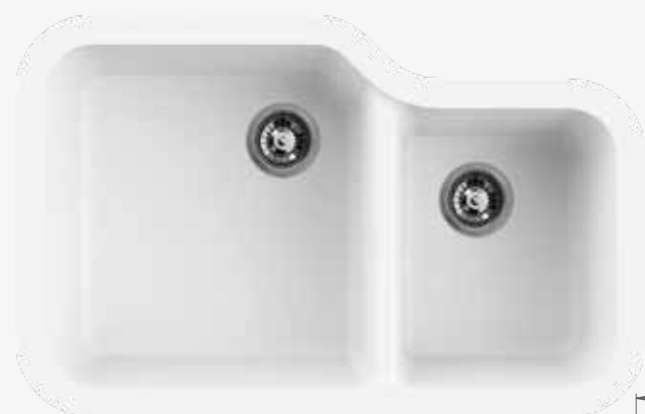

Kuhinjski elementi od ASTONE-a izrađuju se prema Vašim željama i nacrtima.

ASTONE is used for creating elegant kitchen counters that can be seamlessly connected with a sink, creating an exceptionally functional unit that is easy to clean and maintain.

Absence of joints between plates of material, as well as anti-bacterial nature of ASTONE ensure that dirt, bacteria, fungi and other harmful substances won't accumulate, ensuring that hygienic standard is second to none.

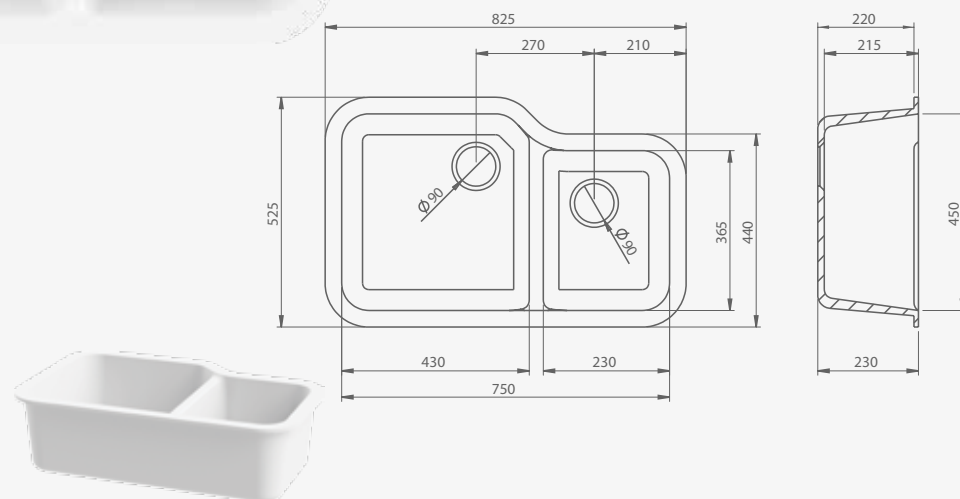

ASTONE kitchen elements can be made by your specific request.

TUŠ KADE shower trays

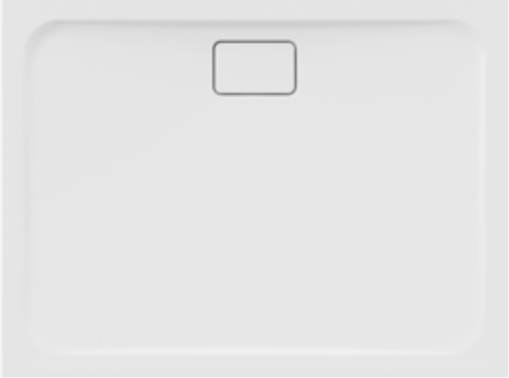

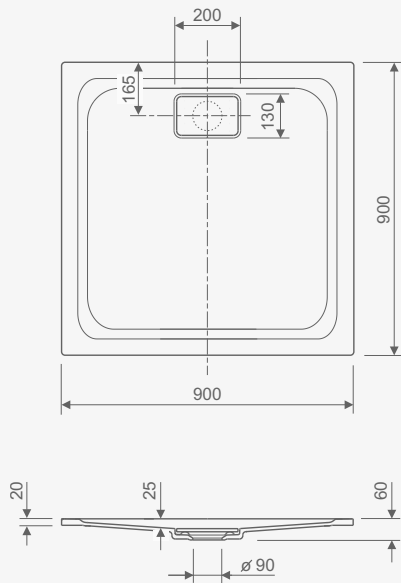

Tuš kade izrađene od ASTONE materijala u bijelom mat efektu odišu elegancijom i kvalitetom te će se zasigurno dopasti onima koji traže nešto više od svoje kupaonice. Ove tuš kade namijenjene su ugradnji u razinu poda, a posebno su dopadljive u kombinaciji sa jednim od modernih paravana iz Aquaestil asortimana.

Shower trays made of ASTONE material in white matte effect are characterized by their elegant appearance and quality that will attract those who seek for something more out of their bathroom. These shower trays are intended for floor-level mounting and are particularly appealing if combined with one of modern shower screens from Aquaestil product assortment.

PALETA BOJA colors

Materijal ASTONE dostupan je u puno različitih boja i efekata kako bi se na najbolji način uklopio u svaki interijer.

Primjenom različitih postupaka i alata, ASTONE proizvodi također su dostupni u sjajnom ili mat efektu što Vam pruža dodatnu fleksibilnost i slobodu pri dizajnu Vašeg savršenog interijera. Za radne površine preporučamo mat efekt zbog visoke otpornosti na habanje, dok su sjajne i visoko sjajne površine primarno namijenjene dekoraciji prostora.

ASTONE material is available in multiple different colors and effects which allows it to be perfectly blended in every interior.

By applying different procedures and tools, ASTONE products are also available in a shiny or matte effect that gives you additional flexibility and freedom in the design of your perfect interior. For work surfaces we recommend matte effect due to high wearing resistance, while shiny and high gloss surfaces are primarily intended for decoration.

Jednostavno održavanje Easy maintenance

ASTONE je vrlo jednostavan za čišćenje i održavanje! Sve što trebate je spužva, voda i sredstvo za odmašćivanje (npr. deterdžent za suđe). Također se može očistiti alkoholom ili deterdžentima namijenjenim keramici. Za uklanjanje kamenca, koristite spužvu natopljenu octom ili sredstvom za čišćenje na bazi octa ili limunske kiseline. Zatim obrišite površinu sa suhom tkaninom i gotovi ste!

Ukoliko želite, vosak koji se obično koristi za akrilne, poliesterske i kamene površine može se primijeniti za dodatnu zaštitu.

U slučaju ogrebotina, materijal se može brusiti ili polirati ovisno o odabranoj završnoj obradi (mat ili sjajna) te na taj način povratiti izvorni izgled.

ASTONE is very easy to clean and maintain! All you need is a sponge, water and a degreasing agent (eg. dish detergent). It can also be cleaned with alcohol or detergents intended for ceramics. To remove limescale, use a sponge soaked in vinegar or a cleaning agent based on vinegar or citric acid. Then wipe the surface with a dry fabric and you are done!

If desired, wax that is normally used for acrylic, polyester and stone surfaces can be applied for additional protection.

In case of scratches, it can be brushed or polished depending on the chosen finish (matte or shiny) to recover its original appearance.

Zašto mi? Why us?

- ugodan na dodir *pleasant to the touch*
- homogen i neporozan *homogeneous and nonporous*
- otporan na termalne šokove i udarce *resistant to thermal shock and impacts*
- neosjetljiv na većinu kemikalija *resistant to most chemicals*
- stabiliziran na UV zrake *stabilized against UV rays*
- higijenski i ekološki siguran *hygienic and environmentally friendly*
